

A man in a dark blue sweater and an orange high-visibility vest is working on a laptop inside an open electrical cabinet. The cabinet contains various electrical components, including a meter and a terminal block. The background is a clear blue sky. The overall scene is brightly lit, suggesting an outdoor or well-lit indoor environment.

Data & Measurement Solutions

Your Multi Utility Business

Select Data & Measurement Solutions (Select DMS) is a leading end-to-end gas, electricity, and water metering business.

Select Data and Measurement Solutions (DMS) is a leading end-to-end electricity, gas and water metering business. Select DMS offers a range of options that convert energy and water usage data into meaningful information. This information is made available through a suite of reports, profiles, quality metering data and analysis which can be tailored to meet your business needs.

Specialists in the Field

As an accredited provider in both Meter Asset Management and Meter Data Management, Select DMS specialises in:

- Continuously Improving service delivery to electricity, gas and water utilities and retailers
- Providing customers with a technology partner in advanced metering solutions
- Delivering timely, hassle free, accurate and reliable services to customers
- Streamlining and supporting end-to-end metering processes
- Maintaining quality performance results at competitive rates
- Delivering excellence in industry knowledge & experience. Select DMS offers the ultimate in flexibility and adaptability across all markets including wholesale and generation metering markets. Select DMS can provide multi utility solutions to meet any customer need.

Range of Service Offering

The Select Data and Measurement Solutions network metering services are varied and range from Regulated Meter Reading services to Meter Data Management, New Network Connections and DataNet Energy Management:

Regulated Meter Reading (“MR”) services

We are equipped to read all utility meters (including electricity, gas and water) and have robust subcontractor relationships enabling program optimisation.

Meter Data Management

Complete management of utility metering data including processing of customer service orders/requests and route management.

Client Services

Our client service comprise: Asset Investigations, National Metering Identifier (NMI) and Metering Installation Registration Number (MIRN) Discovery (Retail Transfer Queries). Market transfer and commissioning of Complex and CT new connections.

Meter Provisioning (“MP”) services

Our expertise in electricity, gas and water metering asset planning, sourcing, installation, maintenance and management of related equipment, including revenue and asset investigations offers your business complete peace of mind.

Multi Utility Capability Provider

We are also further building our capability in the remote polling of interval meters (gas/water/electricity) for contestable - industrial & commercial customers.

Network New Connections

Our field services include: Electricity, Gas and Water, ‘green field’ meter connections, service attachments, connection point management, additions and alterations.

Meter Provisioning (“MP”) services

Electricity and gas meter asset planning, sourcing, installation, maintenance and management of related equipment.

Meter Data Provider (“MDP”) services

Remote polling of interval meters for Wholesale, contestable - industrial and commercial, gas and franchise customers. Transfer energy usage information to applicable Retailers, end users, Networks and market system operators, including market transfer and commissioning.

DataNet Energy Management

Our latest web based energy management package, DataNet, provides complete monitoring and reporting for electricity and gas usage. DataNet also has the capabilities to provide time of use tariffs and power factor monitoring.

Data & Measurement Solutions

Implementing Technology

Leading edge expertise in the deployment of advanced metering services and technologies with in house capability to provide support for any metering solution. We are committed in our approach to deliver exceptional outcomes for our customers consistent with our aim in supporting excellence in delivery.

Industry Leader

We are the leading multi utility business in Australia capable of offering tailored solutions to enable customers to manage their energy and water usage. Select DMS is market accredited and committed to meeting and exceeding industry standards. Select DMS offers the added reliability and security of having an established parent company. SP AusNet plays a vital role in the energy supply industry of Victoria, with 100% ownership of the state's primary electricity transmission network, an electricity distribution network located in eastern Victoria and a gas distribution network in western Victoria.

Proven Track record

Meeting your data and meter asset requirements is our core business. We presently manage over 4 million utility meters in the residential market (electricity, gas and water) through the collection, processing and reporting of over 20 million reads. We're also an AEMO accredited top quartile performer and industry leaders in the provision of smart metering technologies to the industrial and commercial market in Victoria, New South Wales, Queensland and South Australia managing over 16 thousand meters.
