

Case Study : Jemena - Gas Services

Jemena is an energy infrastructure and asset management company that owns and manages gas network infrastructure in New South Wales, and gas and electricity infrastructure in Victoria. Across NSW it delivers natural gas to more than 1 million homes and businesses. During 2009 Select Technical Solutions Gas Services commenced the provision of a number of services to Jemena in its pursuit of safe delivery of natural gas to its customers and to maintain integrity of its gas network.

Activities undertaken by Select Technical Solutions Gas Services as part of the contract include:

- Network components testing
- Materials, plastics and field failure testing
- Meter accuracy testing
- Instrument Calibration
- Appliance Testing
- Odorant Monitoring and Surveying
- Gas Analysis
- Technical Investigations
- Industrial Appliances (Type B) Certification

Select Technical Solutions Gas Services has specialised skills and expertise to assist Jemena in their pursuit of maintaining a reliable and sound gas distribution network. We have been able to meet the requirements and targets within specified time frames. All reports and certificates have been issued on time.

Having provided gas network services to network operators / owners over the past few decades we have built a sound expertise to meet Jemena's requirements and provide answers / solutions.

Select Solutions, a division of SP AusNet, offers customers a number of end-to-end services to help manage their energy, water and environmental requirements. This includes functions such as metering, asset inspection, vegetation management and high end technical services in the utility sector.

Select Solutions has a number of specialist business units including: Utility Solutions, Data & Measurement Solutions, Technical Solutions & Telecommunications Solutions.
